

REMOVE INFECTION RISK, PROCESSING COSTS AND SURGEON FRUSTRATION.

STERIBITE® single-use kerrison
is winning over surgeons,
hospitals and surgery centers.

Surgical site infection is a risk in spinal surgery procedures. The STERIBITE single-use kerrison eliminates the threat of costly bioburden and saves your hospital recurring costs of instrument processing, sharpening and expensive operating room delays.

Enjoy the cost savings, risk reduction and surgeon satisfaction with single-use instruments from STERIBITE.
